

FURRYART™

velvet **WARDROBE**

Carry Case and Fashion Kit

This designer wardrobe box with mirror, drawers, hangers and handle is the perfect carry and storage case for your new fashion craft assortment. Now you can create your own line of runway fashions and keep them organized along with your favorite doll accessories and fashion coloring items as you create hundreds of fashion possibilities.

Follow these easy instructions to get started on being your own designer:

Step One

- *Set up your fashion design work area.*

Take each of the components out of your FurryArt Wardrobe Kit and organize them by keeping your fashion dresses and designs together. Keep your markers, glitter glue, magnetic accessories and gems together in one place as you will be using each of them to create fashion design from each of your 10 fashion categories.

Design Tip: Set your doll on the runway stand and place her in front of the mirror inside of the open wardrobe box...this will allow you to visualize the completed garment and choose your colors and embellishments before you begin coloring and designing.

Step Two

- *Organize your Fashion Categories and prepare to color and design with embellishments and Tres Chic "appearing textures."*

Your 10 Fashion Categories:

Urban Groove	express your inner city
Classic	formal and fun
Fun Wear	cool and casual
Princess	formal, time to go to the ball
Holiday Fun	party time fashion
Travel Wardrobe	on the go collection
My Performance	soccer, ballet, rollerblading and cheerleading
Designer Active Wear	sports and style
School Days	in-class fashion
Cool Camp Wear	uniforms and outdoor style

Design Tip: Punch the design out of the paper before you color each individual piece. This will allow you to focus on the specific garment that you are creating and mix n' match with other fashion pieces before you begin to color.

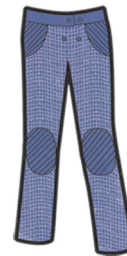

Step Three

- *You are the Fashion Designer: Time to Create*

The washable, non-toxic markers in your kit were made specifically to activate the texture and designs that will appear as you color each of the designer fashions. Choose your marker color combinations for the style and look that you want to create and begin coloring.

Special design textures will appear as you color the dresses, pants, tops, gowns, sportswear and all of the non-magnetic coloring pieces in this kit. The colorful dimension will surprise you with cool textures as you color your fashion assortment. Note that the surprise designs coordinate with each fashion apparel piece that you create! For example: denim texture will appear as you color the denim pants in your "Travel Wardrobe."

Design Tip: You can use different colors of markers to color a single garment and even color over the base color and appearing texture will maintain it's original design.

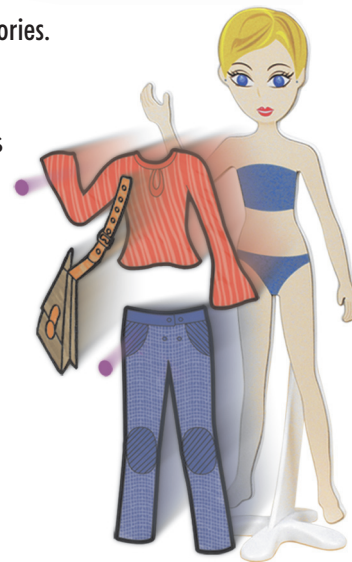

Add your embellishments such as glitter and sequins after you have completed coloring. Simply apply glitter to the fashion wear that you are designing. The sequins and glitter will accent your glam creation. It's up to you to decide on how 'glitzy' to make your designer creations! Remember to always put the cap back on the glitter glue tube.

Design Tip: Glitter provides the perfect accent for Princess, Classic and Urban Groove Fashion categories.

Step Four

- Use the magnetic fashion accessories to attach your fashion creations to the doll. Magnetic accessories include bows, scarves, belts, shoes, handbags, name tags, pins, ties and more to complete your runway look. Simply detach the magnets from the accessory magnet sheet, color the individual accessory with your markers, let it dry and attach your paper fashion onto the doll by using your magnetic accessory piece. You can mix n' match your doll's entire paper wardrobe as you complete more garments and create more fashion.

Design Tip: Use multiple colors to create a more finished fashion feel when coloring the magnetic accessories. For example, color the a handbag purple and the flower on the handbag pink.

Step Five

- Display and Store Your Fashion

You can display your fashion on your doll or hang your dresses in your wardrobe box closet. To store and carry, keep your fashion organized in your wardrobe box between crafting sessions or when coloring is completed.

To hang your fashion creations in the wardrobe closet: Detach the round magnetic hanger dots on your magnetic accessory sheet, lay the paper garment on the hanger and attach a hanger dot over your paper garment. Place the hanger on the rod in the closet. There are enough hangers and dots for 6 hanger placements.

To store and carry your accessories and fashion wardrobe creations: Detach all of your paper punch-out fashion pieces and keep them organized by fashion category inside of your FurryArt Wardrobe Carrying Case. When you are ready to color more wardrobe pieces you can refer to the individual category for your specific design type and create more fashion designs. The pieces that have already been colored can continue to be mix n' matched and displayed on your doll.

Step Six:

"Oops Proof" Coloring allows you to color and craft your Velvet Wardrobe Carry Case by "staying in the lines," and creating a true designer look. You can use sequins and glitter glue to add sparkle to your artwork.

Your durable FurryArt Wardrobe Carrying Case has a handle for on-the-go craft and play fun. The metal clasp in the front of the box keeps the components secure inside the box.

Design Tip: Your FurryArt Wardrobe Carrying Cases is also great for carrying and keeping your favorite "soft" dolls and clothes.

Congratulations, you are ready for the runway!
