

It's fun and easy to create your own scrapbook. Saving your treasured memories in a beautiful keepsake. Your 6x6 Post-bound scrapbook provides the perfect size for displaying your favorite photos and mementos. **This scrapbook will be a creative and personal expression of your most cherished moments.**

Creating Your Scrapbook Pages

STEP 1 Prepare Your Work Area

1 Prepare your work area by laying out all of your photos, papers, accents, mementos and accessories to create your pages.

STEP 2 Organize Your Memories

2 Organize your favorite photos, ticket stubs, newspaper and magazine clips, notes to friends, souvenirs, invitations and anything that makes your memories. Organize them by pages. Telling a visual story with your scrapbook pages is a good thing to keep in mind.

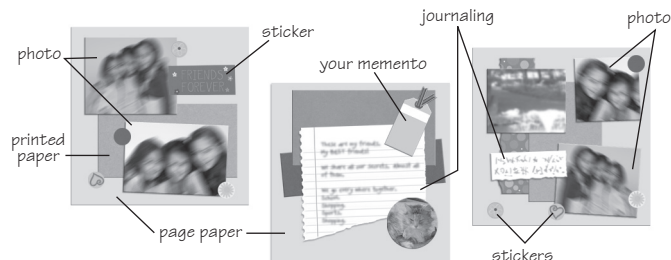

STEP 3 Theme

3 Does your scrapbook have a central theme? BFF, Family, School, Pets, Parties, Birthdays, Holidays, Soccer Game, Ballet, Moods, Teachers, Travel. It may be a certain day, event or just a collection of special memories.

STEP 4 Page Layout

4 Position your photos, accents and words before you finalize your pages. Leave room for journaling with your gel pen if you plan to make comments, quotes or diary entries. Scrapbook pages turn out better with a little planning.

STEP 5 Glue Your Page Elements

5 Complete each page layout by applying glue to the photos and non-adhesive backed components. Your font and designer stickers compliment any page with bright colors and are easy to apply. You can also use your own stickers when you are creating your pages. After you have finished creating your page, let it dry. Turn it over and complete the back page in the same manner. When done, simply slide the page into the sheet protector.

Extra tips and hints

* Feel free to use your own papers to your scrapbook pages. You can use almost anything. Scraps of paper, magazine ads, wrapping paper, old calendar pictures. Use your imagination!

* Helpful Equipment

A good pair of scissors is always helpful. (round tipped scissors for younger scrapbookers.) A ruler and a pencil also come in handy.

* You can create scrapbook pages on both sides of each page. You can also create pages on one side and use the other side for journaling.

* First Time Scrapbookers

- Take your time.
- Plan each page before you glue down your pieces.
- Take care when cropping your photos.

There is no wrong way to scrapbook.

* When adding accent papers to your page, try tearing the paper instead of using scissors. Tearing can create an interesting edge.
